

# Overview of Update 2025-12

Hi all,

## **Introducing Transport Options selection for Events in Carer Orbit**

See below for details on how to start using transport options via Carer Orbit for Event Permissions.

## **Sickbay/Medications rework - Edumate "Medical Centre"**

Our new one-stop shop for sickbay management and medication administration is in development now. Thanks to all who have contributed ideas and feedback. We'll be getting this out to you ASAP. If you missed them last month, click [HERE](#) to see the draft mockups.

## **Edumate - LMS (Canvas) sync: Tasks and Results**

Also in development now, this sync will allow tasks made in Edumate to be published in LMS. Teacher marks the task in LMS. Results return to Edumate Markbook.

## **In Planning - New Signin / Signout screen**

We're making plans to rework the Student Signin/Signout screen, modernising and optimising the interface and adding new features.

- Multiple students for same reason - families late, TAFE, late bus;
- Improved device scanning for student selection;
- Photo preview and alerts displayed

Check out the draft mockup below and contact [greg.collins@edumate.com.au](mailto:greg.collins@edumate.com.au) with your feedback and any other ideas.

# EDU-17709: NEW! Student Medical Info endpoints and tool

We've recently made available new API endpoints for the Enrolments API Group (free version) and a new module report which enables schools to download, review and then upload fresh **student medical information**.

Get Medical Options: <https://integrations.edumate.net/apidoc/#api-Enrolment-GetEnrolmentMedicalOptions>

Post Student Medical Data: <https://integrations.edumate.net/apidoc/#api-Enrolment-PostEnrolmentStudentMedical>

New Module Report: (Found in Edumate Repository - "Get More Reports") "Medical Data Current Students Export".

# EDU-17220: Safety incident Register - new Filters

The contact filter in the Safety Incident Register now includes "Contact Type", additional to "Role" and "Contact". These work together to form an "AND" query.

# EDU-17633: Update My Details

Resolved a lockout situation for approvers where a carer submits a change and then comes to school and gets the same change made directly by staff, before the earlier submission is processed.

# EDU-17994: Student Submitted work - increase max file size to upload

Maximum file size supported is now 50Mb.

# EDU-18022: Contacts-Generate Lists - add Swimming Ability to column options

Done.

# EDU-18024: Clone Events - include participants

Several customer requests have resulted in the addition of EVENT PARTICIPANTS to an Event Clone. However you added the participants in the original (manual or link to group) is how the clone will add them.

Clone Event

OK

## EDU-15817: Setting current Student to "Application Cancelled" - MORE warnings

The Application Cancelled checkbox is generally only for use BEFORE a student starts at the school (no Form Run Enrolments). There is a rare use case where a student is expected to start, but does not turn up and the school year commences. If Application Cancelled is used for a student who is enrolled in the school, after (now) 2 warnings, Edumate will delete the student's Form Run/s and Classes, including attendance data. **"The student never came to school."**

## EDU-18023: API Admin - suppress API App Client Secret after creation

To provide for even better security, client secrets for API Apps will only be viewable/retrievable immediately after creation. They will not be visible on later return to API App screen. Facility to copy to clipboard is provided. After consultation with several schools, we have provided the ability to re-generate a new Client Secret, in preference to making the admin user recreate the entire API App again from scratch.

App Name

Edumate Carer Orbit App - do not tc
