

Overview of Update 2026-3

Hi all,

Edumate Medical Centre is here!

We're pleased to release our newest substantial feature this month - **Edumate Medical Centre**.

Designed specifically for school staff who operate sickbay, administer medication or work in the School Clinic, Medical Centre provides a centralised Dashboard and a homebase for the activities that these users perform each day. We've listened to user feedback over time and have received several submissions in recent months. The new Edumate Medical Centre leverages off some of our existing medical features - many of which have been significantly upgraded. It also introduces many brand new features that are needed in the current school environment.

Coming soon - Canvas sync II

Our new, enhanced Canvas sync sends Edumate coursework tasks to Canvas, where students can complete the task and submit it in Canvas. Teachers can mark the task in Canvas, then the results sync back to Edumate for reporting and archiving. We've been able to support scoring of tasks marks or grades AND criteria grading within the task via Canvas Rubrics. This work is in testing now. We've been busy!

Carer Orbit - further Homepage customisations

Have you made use of the new customisation options available to schools for Carer Orbit's Homepage? You can set these up without our help - just refer to our new Guide in **Edumate Community>Help Articles>Orbit Apps and Edumate Portals>Homepage Customisations** or [CLICK HERE](#)

Check out the help document at [Edumate Community>Help Articles>Welfare>Edumate Medical Centre Guide](#).

The screenshot shows the Edumate Medical Center Dashboard. At the top, there is a navigation bar with 'Medical Center > Dashboard' and three main sections: 'SICKBAY REGISTER', 'GIVE MEDICATION REGISTER', and 'SCHEDULED MEDICATION REGISTER'. Below this, the 'Sickbay On 23/02/2026' section is active, displaying a table of student admissions. The table includes columns for Time In, Time Out, Sickbay Status, Name, Student Number, Form Run, Alerts, Presentation, and Last Updated. Below the sickbay table is the 'Scheduled Medications On 23/02/2026' section, which shows a table of scheduled doses with columns for Scheduled Time, Name, Student Number, Form Run, Medication, Dose, Notes, Time Given, and Given By. At the bottom, there is a 'Student Medical Profile' section with a search bar.

EDU-18132: Events - scheduled event hides class/es for staff

Resolved an issue that made it difficult for teachers to create a lesson plan directly from their own timetable when an event was scheduled - which appeared on top of the class. An icon to create a lesson plan for the lesson "underneath" the event is now part of the event block.

EDU-18097: Welfare - cancel Formal Detention when discipline approval is rejected

Where a discipline record that includes a formal detention requiring approval is rejected, we now remove the detention as well as the discipline record.

EDU-18186: Carer Orbit - push notification reliability when school is a "fresh" app user.

We've hardened logic so that schools who have never used an app prior to Carer Orbit get reliable Push Notifications.

EDU-18141: Update My Details - further hardening

More steps to deal with inexplicable behaviour by carers when submitting Update My Details requests. They are very creative!

EDU-18133: Edumate 7 - `{{item_student_auto_carer_mail_address}}` - labels

Rectified a problem in Edumate 7 where this variable did not work in mailing label applications.

EDU-18082: API Audit Logs - remove after 14 days

To assist schools who are heavy API users with disk space management, we have introduced a 14 day limit on storage of API call audit log data. API Audit Log data older than 14 days is now deleted on a daily basis.

Academic Reports - Student Voice

Several schools have requested we develop the ability for students to make comment on both their coursework and overall work that can be included in formal Academic Reports each Report Period.

We've designed a model that includes options of COURSE Student Voice entries, and/or SUMMATION Student Voice entries.

After the school enables the desired features in Edumate Settings, the student would use the Student Portal to add their comments and submit.

The Student interface might look something like this...

Summation Student Voice comment

Overall I dislike school. I have not much more to say.

Teachers will be able to view and edit the student submissions via Write Summation Reports and Write Course Reports. Once reviewed, the teacher will be able to lock the submission from further changes.

Print Variables will be developed so Student Voice can be added to Academic Report Templates. `{{COURSE_STUDENT_VOICE}}`, `{{SUMMATION_STUDENT_VOICE}}`.

If you have any thoughts about how this should behave, please don't hesitate to contact our Director of Product, Greg Collins at greg.collins@edumate.com.au. We'd love to hear everyone's ideas on this!
